PROJECT TITLE

Necry OER Portal

(NECRYOER) — Digital Library & Marketplace

SUBJECT CODE	ITCC 104
SUBJECT DESCRIPTION	Relational Database Management System
DATE OF SUBMISSION	June 2026
NAME OF INSTRUCTOR	BERNIE S. BALIGHOT
ACADEMIC RANK	Associate Professor I

TABLE OF CONTENTS

- III. System Introduction
- IV. System Requirements
- V. System Installation Guide
- VI. Login and User Access
- VII. System Features & Operations
- VIII. CRUD Operations Guide
- IX. Searching & Filtering
- X. Report Generation
- XI. Error Handling & Troubleshooting
- XII. Frequently Asked Questions
- XIII. System Maintenance & Backup
- XIV. Appendices (A–F)

III. SYSTEM INTRODUCTION

v. System Name

The official name of the system is “Necry OER Portal” (also referred to as NECRYOER). It is an Open Educational Resources digital marketplace designed for the academic community of Agusan del Sur State University.

B. System Description

The Necry OER Portal is a decoupled web application that provides a centralized platform for the discovery, sharing, and monetization of educational materials. Built with a modern technology stack (React 18 frontend, CodeIgniter 4 backend, MariaDB database), the system enables educators to upload and sell their learning resources while allowing students to access high-quality, affordable educational content.

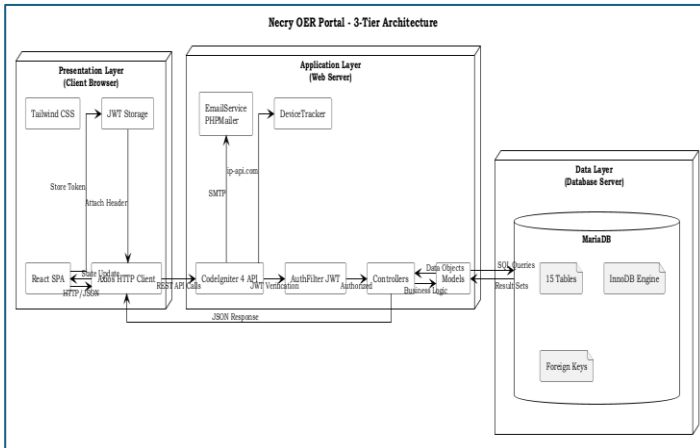

Figure 1: Necry OER Portal – Three-Tier System Architecture

Key capabilities include: user registration with email OTP verification, role-based access control (Administrator, Uploader, Student, Guest), resource browsing and search, secure purchase with automatic discount computation, digital content delivery via in-app reader, subscription tier upgrades, uploader earnings tracking, and payout management.

C. Intended Users

1. Administrator

- Manages all user accounts and system configuration
- Approves or rejects uploaded educational resources
- Processes uploader withdrawal requests
- Oversees departments, courses, and sections

2. Uploader / Author

- Uploads educational materials (PDF books, resources)
- Sets prices and preview configurations
- Tracks sales, earnings, and transaction history
- Manages payout accounts (Gcash, Maya, Bank)
- Requests withdrawal of accumulated earnings

3. Student / Regular User

- Registers with email OTP verification
- Browses and searches the digital library catalog
- Purchases resources with best-available discounts
- Upgrades subscription tier (Pro/Pro+)
- Opens and reads purchased materials

4. Guest User

- Browses public catalog and resource details
- Searches available materials
- Must register to access full content

IV. SYSTEM REQUIREMENTS

v. Hardware Requirements

The following are the minimum hardware requirements to access the Necry OER Portal:

Component	Minimum Requirement	Recommended
Processor	Intel Celeron / AMD A4	Intel i5 / AMD Ryzen 5
RAM	4 GB	8 GB or higher
Storage	500 MB free space	1 GB SSD
Display	1366 x 768 resolution	1920 x 1080
Internet	DSL / Fiber (1 Mbps)	Fiber (5 Mbps+)
Printer	Not required	Any printer (for reports)

B. Software Requirements

Software	Version	Purpose
Web Browser	Chrome 90+ / Firefox 88+ / Edge 90+	Access the web application
Operating System	Windows 10+, macOS 11+, Linux	Platform compatibility
Node.js (Dev only)	18.x or higher	React development server
PHP (Server)	8.2 or higher	Backend API runtime
MariaDB / MySQL	10.4+ / 8.0+	Database server
Apache / Nginx	2.4+ / 1.18+	Web server
Composer	2.x	PHP dependency manager

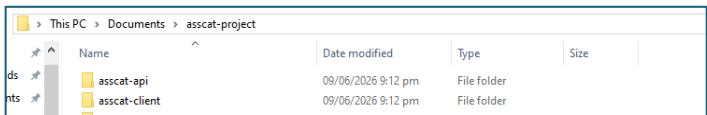

V. SYSTEM INSTALLATION GUIDE

This guide provides step-by-step instructions for installing and deploying the Necry OER Portal on a local development environment or a live web host.

Step 1: Download the Project Files

Download the project source code from the repository or copy the project folder to your web server directory. The project consists of two main directories:

- asscat-client/ – React 18 frontend application
- asscat-api/ – CodeIgniter 4 PHP backend API

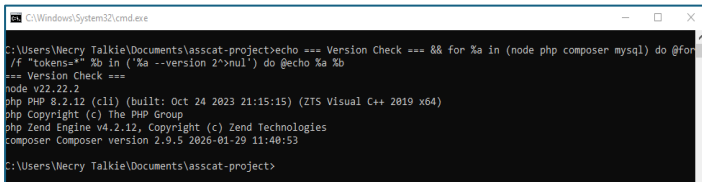

This PC > Documents > asscat-project				
	Name	Date modified	Type	Size
	asscat-api	09/06/2026 9:12 pm	File folder	
	asscat-client	09/06/2026 9:12 pm	File folder	

Step 2: Install Required Software

Ensure the following software is installed on your system:

- Node.js (v18 or higher) for running the React frontend
- PHP 8.2 or higher for the CodeIgniter 4 backend
- Composer for PHP dependency management
- MariaDB or MySQL for the database
- A web server (Apache or Nginx)

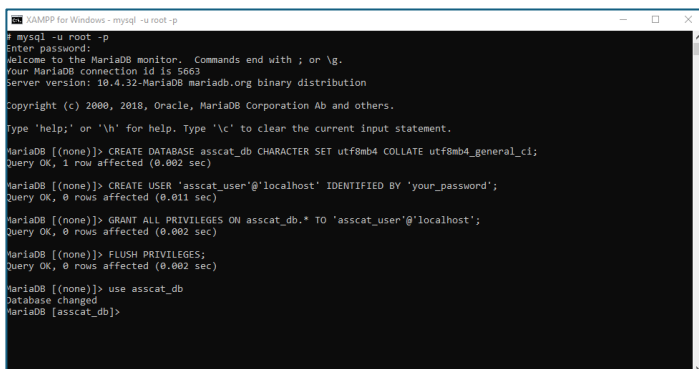

```
C:\Windows\System32\cmd.exe
C:\Users\Wecry Talkie\Documents\asscat-project>echo === Version Check === && for %a in (node php composer mysql) do @for
/f "tokens=*" %b in ('%a --version 2^>nul') do @echo %a %b
=== Version Check ===
node v22.22.2
php PHP 8.2.12 (cli) (built: Oct 24 2023 21:15:15) (ZTS Visual C++ 2019 x64)
php Copyright (c) The PHP Group
php Zend Engine v4.2.12, Copyright (c) Zend Technologies
composer Composer version 2.9.5 2026-01-29 11:40:53
C:\Users\Wecry Talkie\Documents\asscat-project>
```

Step 3: Configure the Database

Create a new database for the system:

```
CREATE DATABASE asscat_db CHARACTER SET utf8mb4
COLLATE utf8mb4_general_ci;
CREATE USER 'asscat_user'@'localhost' IDENTIFIED BY
'your_password';
GRANT ALL PRIVILEGES ON asscat_db.* TO
'asscat_user'@'localhost';
FLUSH PRIVILEGES;
```

The database tables will be automatically created by the application's FeatureSchema migration system on first run. Alternatively, import the provided SQL file if available.

A screenshot of a terminal window titled "XAMPP for Windows - mysql -u root -p". The terminal shows the following sequence of commands and output:
mysql -u root -p
Enter password:
Welcome to the MariaDB monitor. Commands end with ; or \g.
Your MariaDB connection id is 5663
Server version: 10.4.32-MariaDB mariadb.org binary distribution
Copyright (c) 2000, 2018, Oracle, MariaDB Corporation Ab and others.
Type 'help;' or '\h' for help. Type '\c' to clear the current input statement.
MariaDB [(none)]> CREATE DATABASE asscat_db CHARACTER SET utf8mb4 COLLATE utf8mb4_general_ci;
Query OK, 1 row affected (0.002 sec)
MariaDB [(none)]> CREATE USER 'asscat_user'@'localhost' IDENTIFIED BY 'your_password';
Query OK, 0 rows affected (0.011 sec)
MariaDB [(none)]> GRANT ALL PRIVILEGES ON asscat_db.* TO 'asscat_user'@'localhost';
Query OK, 0 rows affected (0.002 sec)
MariaDB [(none)]> FLUSH PRIVILEGES;
Query OK, 0 rows affected (0.002 sec)
MariaDB [(none)]> use asscat_db
Database changed
MariaDB [asscat_db]>

Step 4: Configure Backend (asscat-api)

Navigate to the asscat-api directory and install PHP dependencies:

```
cd asscat-api
composer install
```

Copy the .env file and configure database connection:

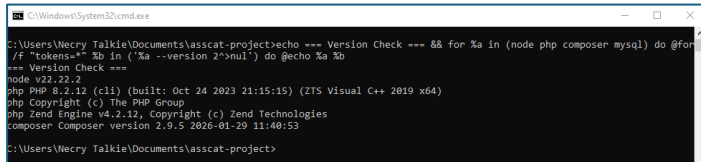

```
cp env .env
# Edit .env with your database credentials:
# database.default.hostname = localhost
# database.default.database = asscat_db
# database.default.username = asscat_user
# database.default.password = your_password
# database.default.DBDriver = MySQLi
```

Configure email settings in app/Config/Email.php for SMTP:

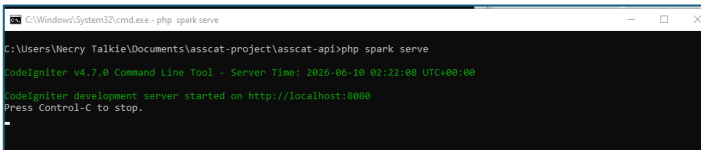

```
// app/Config/Email.php
public $protocol = 'smtp';
public $SMTPHost = 'smtp.gmail.com';
public $SMTPUser = 'your_email@gmail.com';
public $SMTPPass = 'your_app_password';
public $SMTPPort = 587;
public $SMTPCrypto = 'tls';
```

Start the backend server:

```
php spark serve
```

A terminal window titled 'C:\Windows\System32\cmd.exe' showing the output of a version check command. The output lists the versions of Node.js, PHP, and Composer.

```
C:\Users\Wecry Talkie\Documents\asscat-project>echo === Version Check === && for %a in (node php composer mysql) do @for /f "tokens=*" %b in ('%a --version 2>nul') do @echo %a %b
=== Version Check ===
node v22.22.2
php PHP 8.2.12 (cli) (built: Oct 24 2023 21:15:15) (ZTS Visual C++ 2019 x64)
php Copyright (c) The PHP Group
php Zend Engine v4.2.12, Copyright (c) Zend Technologies
composer Composer version 2.9.5 2026-01-29 11:40:53
C:\Users\Wecry Talkie\Documents\asscat-project>
```

A terminal window titled 'C:\Windows\System32\cmd.exe - php spark serve' showing the output of the 'php spark serve' command. It indicates that the CodeIgniter development server has started on http://localhost:8000.

```
C:\Users\Wecry Talkie\Documents\asscat-project\asscat-api>php spark serve
CodeIgniter v4.7.0 Command Line Tool - Server Time: 2026-06-10 02:22:00 UTC+00:00
CodeIgniter development server started on http://localhost:8000
Press Control-C to stop.
-
```

Step 5: Configure Frontend (asscat-client)

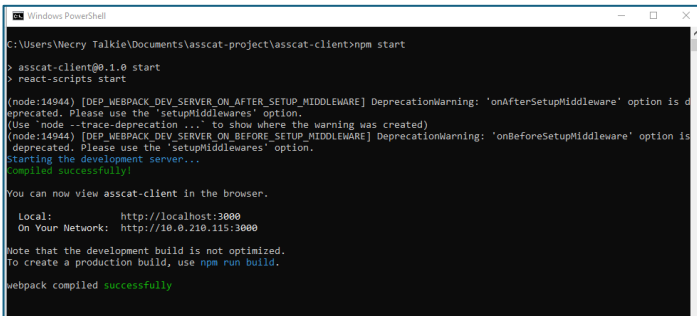

Navigate to the `asscat-client` directory and install dependencies:

```
cd asscat-client  
npm install
```

Start the React development server:

```
npm start
```

The frontend will open at <http://localhost:3000>. Update the API base URL in the code if your backend runs on a different port.

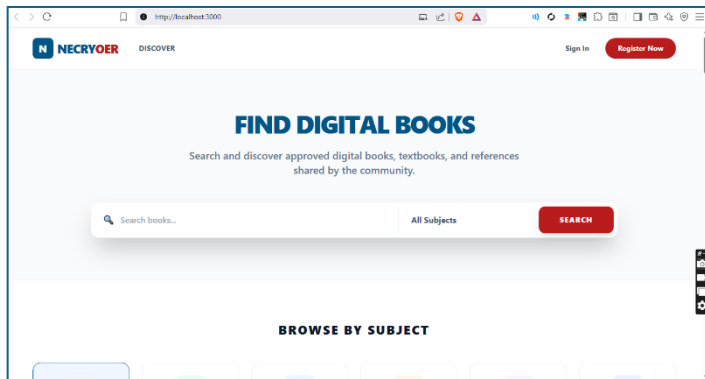

```
Windows PowerShell  
C:\Users\Wecry Talkie\Documents\asscat-project\asscat-client>npm start  
  
> asscat-client@0.1.0 start  
> react-scripts start  
  
(node:14944) [DEP_WEBPACK_DEV_SERVER_ON_AFTER_SETUP_MIDDLEWARE] DeprecationWarning: 'onAfterSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.  
(Use 'node --trace-deprecation ...' to show where the warning was created)  
(node:14944) [DEP_WEBPACK_DEV_SERVER_ON_BEFORE_SETUP_MIDDLEWARE] DeprecationWarning: 'onBeforeSetupMiddleware' option is deprecated. Please use the 'setupMiddlewares' option.  
Starting the development server...  
Compiled successfully!  
  
You can now view asscat-client in the browser.  
  
Local:      http://localhost:3000  
On Your Network:  http://10.0.210.115:3000  
  
Note that the development build is not optimized.  
To create a production build, use npm run build.  
  
webpack compiled successfully
```

Step 6: Access the System

Open a web browser and navigate to:

```
Frontend: http://localhost:3000  
Backend API: http://localhost:8080
```

You should see the Necry OER Portal home page with the catalog, search bar, and navigation links.

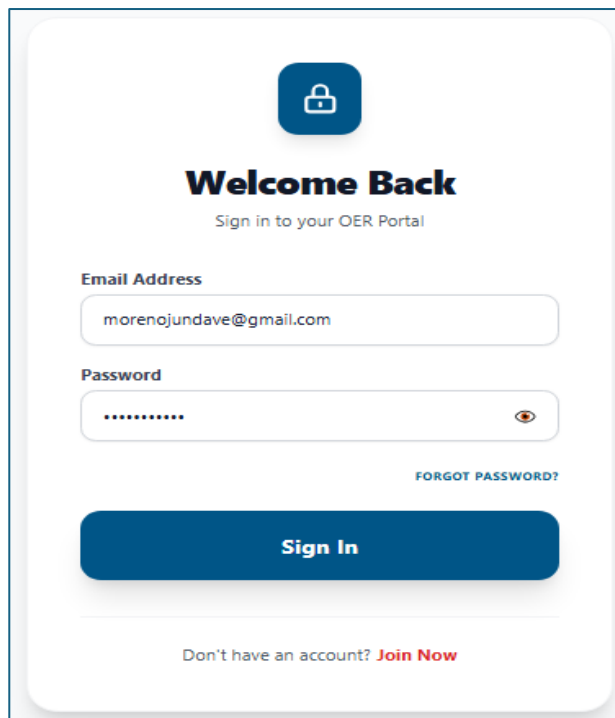

For production deployment on a live web host:

- Build the React frontend: `npm run build`
- Upload the `asscat-api` and the built frontend to your web host
- Configure the web server (Apache/Nginx) to serve the frontend and route API requests
- Set up the database on the host's MySQL/MariaDB server
- Update `.env` with production database credentials and the live site URL

VI. LOGIN AND USER ACCESS

A. Login Page

The Login page allows registered users to access their accounts. To access the Login page, click the "Login" button on the top-right corner of the navigation bar.

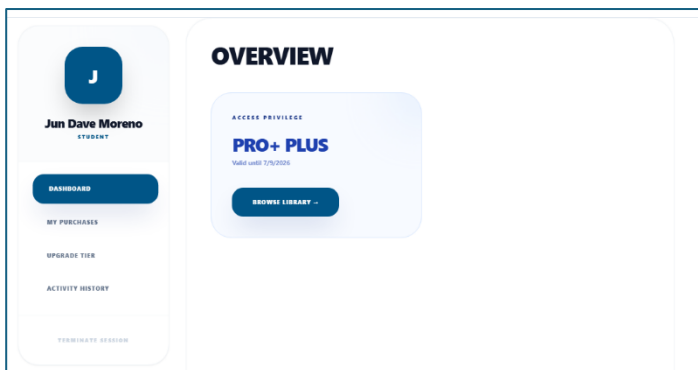

The image shows a login page with a white background and a blue border. At the top center is a blue square icon with a white padlock. Below it, the text "Welcome Back" is displayed in a large, bold, black font. Underneath, in a smaller font, is "Sign in to your OER Portal". There are two input fields: "Email Address" with the text "morenojundave@gmail.com" and "Password" with masked characters "*****". To the right of the password field is a small eye icon. Below the password field is a link that says "FORGOT PASSWORD?". At the bottom is a large blue button with the text "Sign In" in white. Below the button is a horizontal line, and at the very bottom is the text "Don't have an account? [Join Now](#)".

Login Procedure

Follow these steps to log in to the system:

1. Navigate to the Necry OER Portal home page.
2. Click the "Login" button on the top navigation bar.
3. Enter your registered email address in the Email field.
4. Enter your password in the Password field.
5. Click the "Login" button.
6. Upon successful authentication, you will be redirected to your Dashboard.

Troubleshooting Login Issues

- If your email is not yet verified, you will receive a 403 error with instructions to verify.
- If you forgot your password, click the "Forgot Password?" link to reset it via email OTP.
- After multiple failed attempts, your IP will be temporarily locked for security.

B. User Roles

The system has four user roles, each with specific permissions and capabilities:

Figure 2: Use Case Diagram – System Actors and Functionalities

Role	Permissions	Accessible Pages
Administrator	Full system management: users, resources, withdrawals, system config	Home, Dashboard (admin tabs), All admin pages
Uploader	Upload resources, manage content, track earnings, request payouts	Home, Dashboard (My Uploads, Earnings, Payouts)
Student	Browse, purchase, read resources, upgrade subscription	Home, Dashboard (My Purchases, Subscription)
Guest	Browse catalog, view resource details, search	Home, Resource Detail (read-only)

VII. SYSTEM FEATURES & OPERATIONS

Feature 1: User Registration

Registration with OTP Verification

Purpose:

Allows new users to create an account with email verification for security.

Procedure:

1. Click "Sign Up" on the navigation bar.
2. Fill in the registration form: Name, Email, Password, Confirm Password, Role (Student or Uploader), and Education Level (if Student).
3. Upload a proof document if registering as a Student (e.g., school ID, enrollment form).
4. Click "Send OTP" — a 6-digit code will be sent to your email.

5. Enter the OTP code in the verification field.
6. If OTP expires, click "Resend Code" to receive a new one.
7. Click "Verify & Register" to complete registration.

Expected Output:

You will be redirected to the Login page. Your account is now active with email_verified=1. You can now log in with your registered email and password.

The image displays two sequential steps of a registration process. The first screen, titled "JOIN US" with the subtitle "ESTABLISH YOUR IDENTITY", contains four input fields: "FULL IDENTITY" (filled with "Jun Dave Moreo"), "EMAIL ADDRESS" (filled with "jundavemoreno123@gmail.com"), "SECRET KEY" (filled with "090812921137Apple" and accompanied by a key icon), and "ENGAGEMENT TYPE" (filled with "REGULAR CITIZEN"). A blue button labeled "SEND VERIFICATION CODE" is at the bottom, with a link "ALREADY HAVE ACCESS? AUTHORIZE HERE" below it. An arrow points from this screen to the second screen. The second screen, titled "VERIFY EMAIL" with the subtitle "ENTER THE 6-DIGIT CODE", shows a green message "VERIFICATION CODE SENT TO YOUR EMAIL." and a blue box with a smartphone icon and the text "A 6-digit code was sent to jundavemoreno123@gmail.com". Below this, the "VERIFICATION CODE" field contains the digits "0 9 4 2 2 4". A blue button labeled "COMPLETE REGISTRATION" is at the bottom, with a link "RESEND IN 52S" below it.

Feature 2: Browsing the Catalog

Resource Catalog Browsing

Purpose:

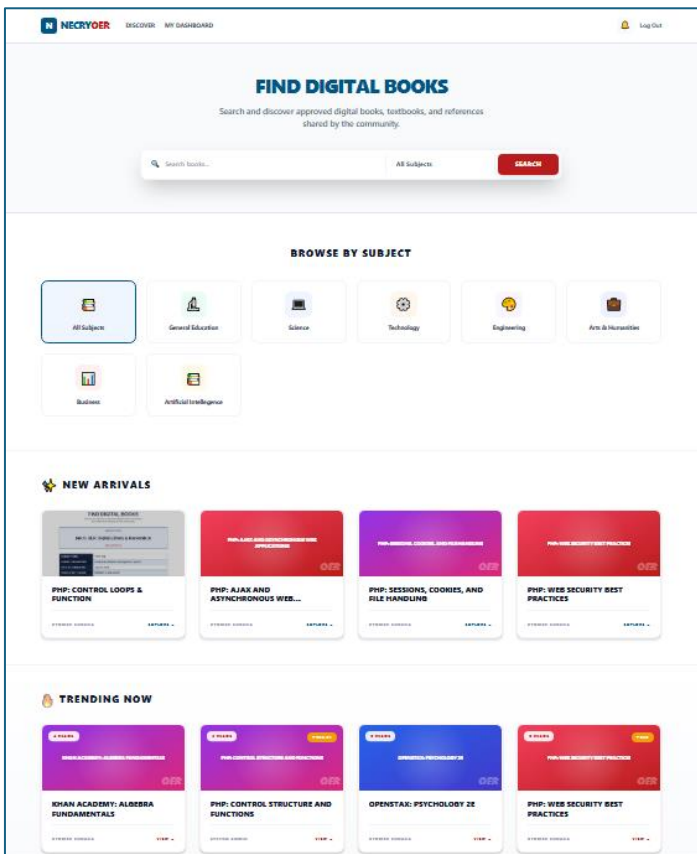

Enables users to discover available educational materials organized by department and course.

Procedure:

1. On the Home page, browse the "New Arrivals" section for recently added resources.
2. Use the department/subject filter dropdown to narrow results by academic department.
3. Scroll through the catalog grid showing resource cards with cover images, titles, and prices.
4. Click on any resource card to view its detailed information page.

Expected Output:

The catalog displays all approved resources sorted by newest first. Each card shows the cover thumbnail, title, price (with discount if applicable), and author.

Feature 3: Searching for Resources

Search Functionality

Purpose:

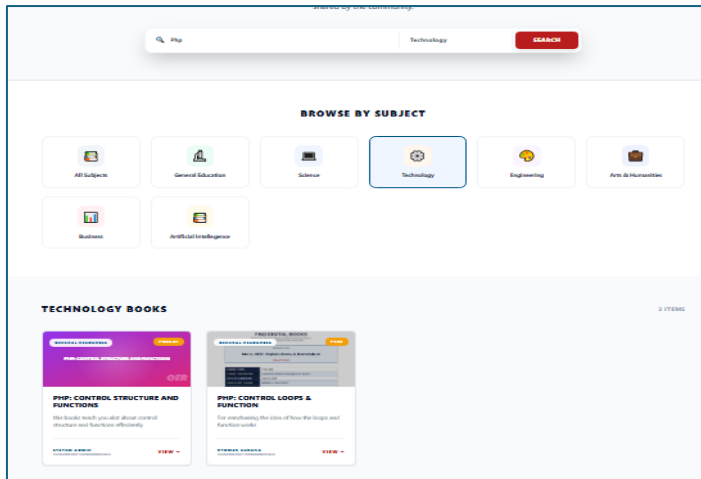

Allows users to find specific resources by title keyword.

Procedure:

1. Locate the search bar at the top of the Home page.
2. Type a keyword related to the resource title (e.g., “Database”, “Programming”).
3. The catalog will automatically filter to show matching resources as you type.
4. Clear the search field to reset the full catalog view.

Expected Output:

The catalog dynamically filters to display only resources whose titles match the search keyword. Non-matching resources are hidden.

Feature 4: Resource Detail View

Resource Detail Page

Purpose:

Provides comprehensive information about a specific educational resource.

Procedure:

1. Click on a resource card from the catalog.
2. The Resource Detail page displays: cover image, title, author, ISBN, edition,

publisher, page count, language, and description.

3. If logged in, the discount breakdown is shown: original listed price, discount percentage (from promo or subscription), discounted price, and savings amount.

4. Click "Open" to access the resource if you have already purchased it.

5. Click "Purchase" to buy the resource.

Expected Output:

You see the complete resource information with pricing details. If a discount applies, a green badge shows the source ("Promo Discount" or "Subscription Discount") and the calculated savings.

Feature 5: Purchasing a Resource

Resource Purchase with Discount

Purpose:

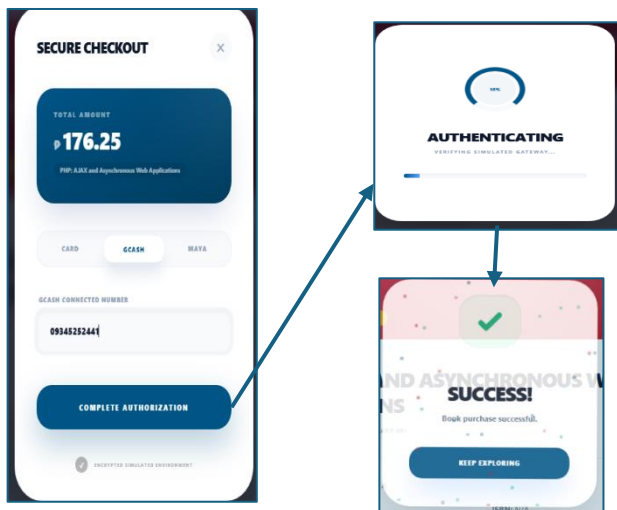

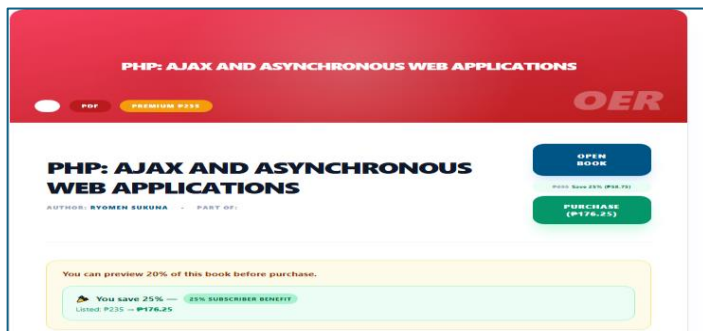

Enables students to purchase resources at the best available price.

Procedure:

1. On the Resource Detail page, review the price and discount information.
2. Click the "Purchase" button.
3. A Payment Method modal appears — select your preferred method (Card, GCash, or Maya).
4. Click "Confirm Payment" to proceed.
5. A progress animation plays as the system processes the payment.
6. Upon success, a celebration overlay appears with a success message.
7. A purchase receipt is sent to your registered email.

Expected Output:

The resource is now in your library. You can access it anytime by clicking "Open" on the Resource Detail page or from the "My Purchases" tab in your Dashboard.

Feature 6: Opening and Reading Resources

In-App Resource Reader

Purpose:

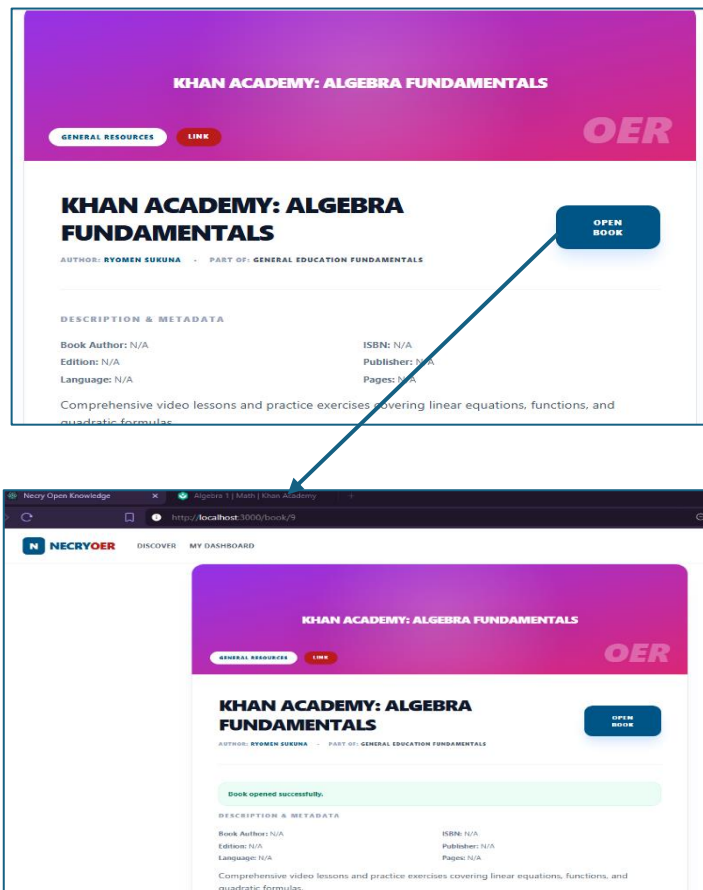

Allows users to read purchased resources directly within the browser.

Procedure:

1. Navigate to a resource you have purchased.
2. Click the "Open" button on the Resource Detail page.
3. The resource opens in an in-app viewer/reader.
4. Use the viewer controls to navigate through pages.
5. Access is logged in the system for tracking purposes.

Expected Output:

The resource content is displayed securely within the browser. Uploaders can open their own materials for free without any purchase requirement.

Feature 7: Dashboard Overview

User Dashboard

Purpose:

Provides a centralized hub for managing account activities based on user role.

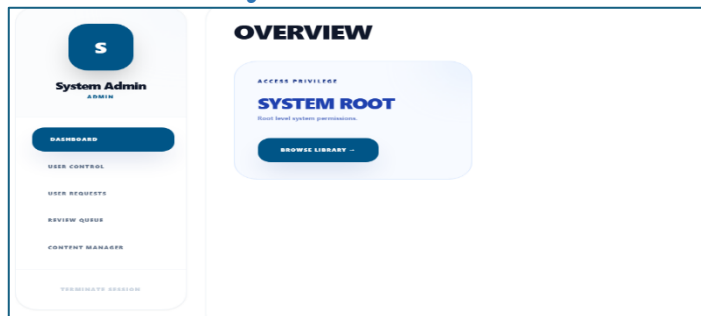

Procedure:

1. Click "Dashboard" in the navigation bar after logging in.
2. The Dashboard displays different tabs based on your role:
3. For all users: Profile, Notifications, Activity History.
4. For Students: My Purchases, Subscription upgrade.
5. For Uploaders: My Uploads, Earnings & Payouts.

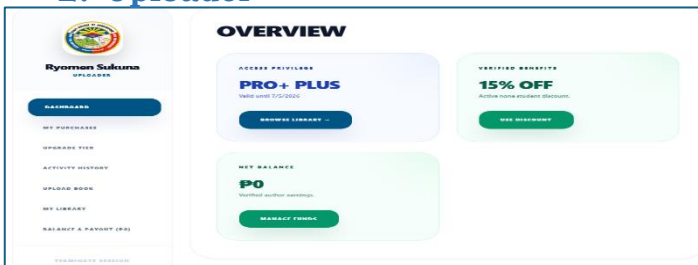

Expected Output:

The Dashboard adapts to your role, showing only relevant sections and features.

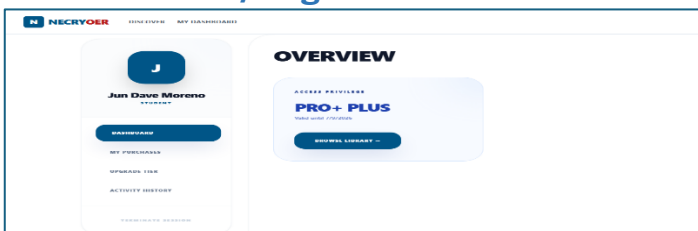

1. Admin Sys

2. Uploader

3. Student/Regular user

Feature 8: My Purchases (Students)

My Purchases Tab

Purpose:

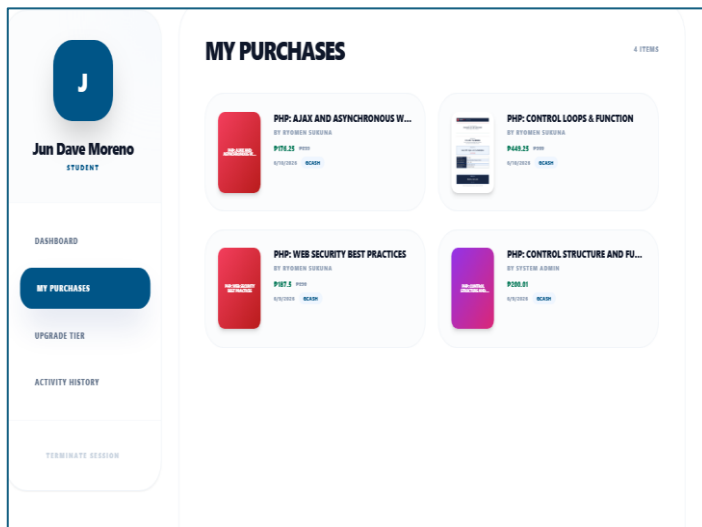

Lists all resources purchased by the student.

Procedure:

1. Go to Dashboard > My Purchases tab.
2. View a table listing all purchased resources with: title, listed price, discount, paid amount, and purchase date.
3. Click "Open" on any resource to access it directly.

Expected Output:

A complete list of all your purchases is displayed, allowing quick access to any purchased resource.

Feature 9: Subscription Upgrade

Subscription Tier Upgrade

Purpose:

Allows students to upgrade their account for additional discounts.

Procedure:

1. Go to Dashboard > Subscription tab.
2. View the current subscription tier and available upgrade options.
3. Compare the benefits: Pro (10% discount) vs Pro+ (25% discount).
4. Click "Upgrade" on your chosen tier.
5. Select a payment method in the Payment Modal.
6. Confirm payment to complete the upgrade.

Expected Output:

Your subscription tier is updated immediately. All future purchases will automatically receive the tier discount. An upgrade confirmation email is sent.

SELECT PLAN

BENEFIT	FREE	PRO	PRO+
Monthly Price	P0	P499	P899
Material Opens	5 / 30 days	50 / 30 days	Unlimited
Downloads	✗	✓	✓
Purchase Discount On paid materials	0%	10% OFF	25% OFF

PRO PLAN

 + 10% OFF ALL MATERIAL PURCHASES

P 499.00 / MONTH

ACTIVATE

PRO+ PLAN

Unlimited opens, downloads allowed, and 25% off all purchases.

 + 25% OFF ALL MATERIAL PURCHASES

P 899.00 / MONTH

ACTIVATE

Feature 10: My Uploads (Uploaders)

Upload Management

Purpose:

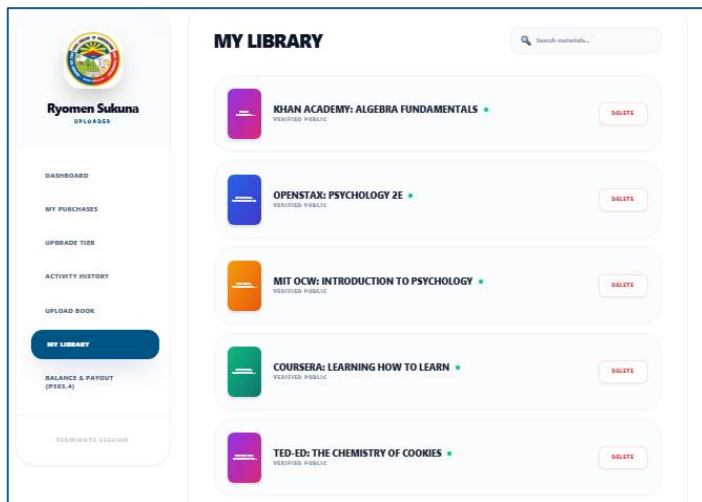

Enables uploaders to manage their submitted educational materials.

Procedure:

1. Go to Dashboard > My Uploads tab.
2. View all your uploaded resources in a list with title, status (approved/pending), price, and upload date.
3. Use the search bar within My Uploads to filter by title.
4. Click "Delete" on a resource to remove it (confirmation required).

Expected Output:

You can see the status of each upload. Approved resources are publicly visible; pending resources await admin review.

Feature 11: Uploading New Resources

Resource Upload Form

Purpose:

Allows uploaders to submit new educational materials to the platform.

Procedure:

1. Go to Dashboard > My Uploads tab.
2. Click the "Upload New Resource" button.
3. Fill in the upload form with: Title, Author, ISBN (optional), Edition, Publisher, Page Count, Language, and Description.
4. Select the Department, Course, and Section for the resource.
5. Upload the resource file (PDF format, max 100MB).
6. Upload a cover image (JPG/PNG, max 5MB).

7. Set the Price and select Material Type (Book or Resource).
8. Set the Preview Percentage (default 20%).
9. Click "Submit" to upload.
10. The resource will be pending admin approval before becoming public.

Expected Output:

The resource is saved to the database with is_approved=0. An administrator will review and approve it. You will receive a notification once approved.

UPLOAD RESOURCE

FORM FIELDS:

- TITLE:** PHP: Control Logic & Function
- AUTHOR:** Jon Dave Munro
- ISBN:** 1234-5678-9101-1234
- EDITION:** 2nd Edition
- LANGUAGE:** English
- SUBJECT:** Technology
- PRICE:** 250
- PREVIEW PERCENTAGE:** 2
- DESCRIPTION:** For Control Logic

FILE UPLOAD:

- Choose File:** /Users/username/Downloads/Document1.docx
- Choose File:** /Users/username/Downloads/Document1.docx

Submit Resource

Feature 12: Earnings and Payouts (Uploaders)

Earnings Dashboard and Payout System

Purpose:

Allows uploaders to track their revenue and withdraw earnings.

Procedure:

1. Go to Dashboard > Earnings tab.
2. View your current balance, total earnings, pending withdrawals, and total withdrawn amounts.
3. Set up payout accounts: Click "Manage Payout Accounts" to add GCash, Maya, or Bank accounts (up to 3 per type).
4. For Bank accounts, provide: account number, account name, card number, expiry date, and CVV.
5. Set your 6-digit payout PIN for withdrawal security.

6. To withdraw: scroll to the Withdraw section, select a payout account, enter the amount, and click "Withdraw".

7. Enter your 6-digit payout PIN in the modal to confirm.

Expected Output:

The withdrawal request is created with "pending" status. An administrator will review and process the payout. Your balance remains unchanged until the withdrawal is processed.

The image shows two parts of a web application interface. The top part is a dashboard titled "REVENUE & CASHOUT" with a "PRINT REPORT" button. It displays two main metrics: "AVAILABLE BALANCE" of ₱503.4 and "LIFETIME REVENUE" of ₱1,065.4. Below these, it shows "WITHDRAWABLE FUNDS AFTER ALL SUCCESSFUL AND PENDING TRANSACTIONS" and "TOTAL SALES" and "SUCCESS CASHOUTS" with a count of 11 and a value of ₱562. The bottom part is a form titled "ADD YOUR FIRST PAYOUT ACCOUNT" with instructions to add a GCash, Maya, or Bank account. It includes input fields for "GCash" (a dropdown), "Jun Dave Moreno", and "09245224241", followed by an "ADD ACCOUNT" button.

REVENUE & CASHOUT PRINT REPORT

AVAILABLE BALANCE
₱503.4
WITHDRAWABLE FUNDS AFTER ALL SUCCESSFUL AND PENDING TRANSACTIONS

LIFETIME REVENUE
₱1,065.4
TOTAL SALES
SUCCESS CASHOUTS 11 **₱562**

ADD YOUR FIRST PAYOUT ACCOUNT
Add a GCash, Maya, or Bank account (up to 3 per type). Bank accounts require card details.

GCash

Jun Dave Moreno

09245224241

ADD ACCOUNT

Feature 13: Admin – Resource Approval

Resource Moderation

Purpose:

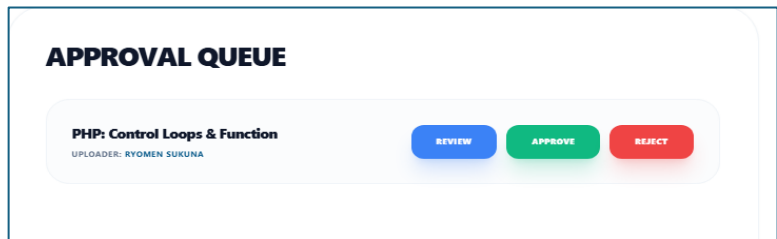

Allows administrators to review and approve/reject uploaded resources.

Procedure:

1. Log in with an Administrator account.
2. Go to Dashboard > the admin-specific section.
3. View a list of pending resources with title, uploader, and upload date.
4. Review the resource details and file.
5. Click "Approve" to make the resource publicly visible.
6. Click "Reject" to remove the resource from the system.

Expected Output:

Approved resources become visible in the public catalog. The uploader receives a notification of the approval decision.

VIII. CRUD OPERATIONS GUIDE

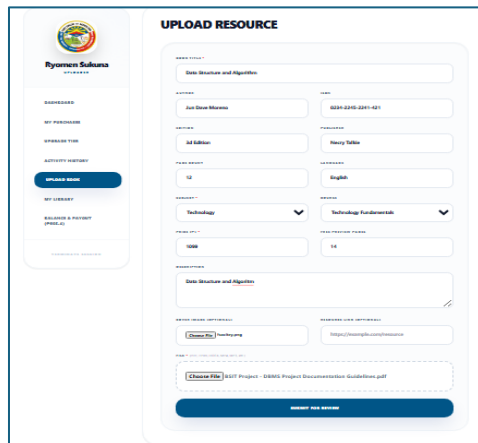

A. Creating Records (CREATE)

Example 1: Upload a New Resource

As an Uploader, you can create new resource records in the system:

Procedure:

1. Navigate to Dashboard > My Uploads and click "Upload New Resource".
2. Fill in all required fields (Title, Price, File, etc.).
3. Click "Submit" to save.

The screenshot displays the 'UPLOAD RESOURCE' interface. On the left is a sidebar with the 'Ryumen Sukana' logo and navigation links: 'DASHBOARD', 'MY PROGRESS', 'UPLOADED FILE', 'ACTIVITY HISTORY', 'MY LIBRARY', and 'PUBLISHED & PRIVATE PROFILE'. The 'UPLOADED FILE' link is highlighted with a blue button labeled 'UPLOAD FILE'. The main content area is titled 'UPLOAD RESOURCE' and contains a form with the following fields: 'Title' (with 'Data Structure and Algorithms' entered), 'Author' (with 'Jon Doe Mawani' entered), 'ISBN' (with 'ISBN-0340-2491-021' entered), 'Edition' (with '1st Edition' entered), 'Category' (with 'Theory' selected from a dropdown), 'Language' (with 'English' selected from a dropdown), 'Subject' (with 'Technology Fundamentals' selected from a dropdown), 'Price' (with '0.00' entered), and 'File' (with 'Data Structure and Algorithms.pdf' entered). Below these fields are sections for 'PUBLISHED' and 'PRIVATE' with checkboxes and buttons. At the bottom, there is a 'Choose File' button and a 'Submit' button.

Expected Output:

The resource is inserted into the database with `is_approved=0`. It appears in My Uploads with "Pending" status.

Example 2: Register a New User

Any guest can create a user account:

Procedure:

1. Click "Sign Up" on the navigation bar.
2. Fill in the registration form.
3. Verify email via OTP code.
4. Complete registration.

Expected Output:

A new user record is created in the users table with `email_verified=1`.

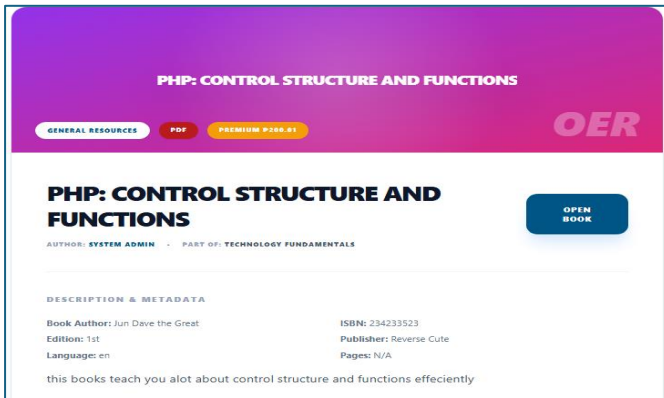

B. Viewing Records (READ)

Example 1: Browse Resource Catalog

All users can view the list of approved resources:

Procedure:

1. On the Home page, view the catalog grid showing all approved resources.
2. Use the department filter or search bar to narrow results.
3. Click a resource card to view detailed information.

Expected Output:

A paginated grid of resource cards, each showing the cover image, title, author, and price. Details include full metadata and discount information.

Example 2: View Purchase History

Students can view their purchase history:

Procedure:

1. Go to Dashboard > My Purchases.
2. View the table listing all purchases with prices and dates.

Expected Output:

A sortable table showing all completed purchases with resource titles, prices, discounts, and purchase dates.

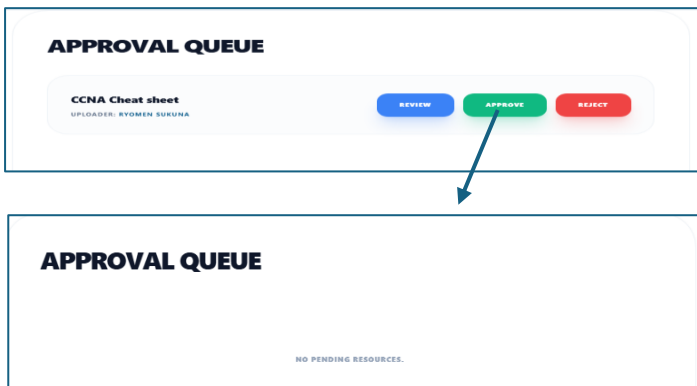

C. Updating Records (UPDATE)

Example 1: Approve a Resource (Admin)

Administrators can update a resource's approval status:

Procedure:

1. Log in as Administrator.
2. Navigate to the admin approval section.
3. Click "Approve" on a pending resource.

Expected Output:

The resource's `is_approved` field is updated from 0 to 1. The uploader receives a notification. The resource becomes publicly visible in the catalog.

Example 2: Upgrade Subscription

Students can update their subscription tier:

Procedure:

1. Go to Dashboard > Subscription.
2. Click "Upgrade" on the desired tier.
3. Confirm payment.

Expected Output:

The user's `subscription_tier` and `subscription_expires_at` fields are updated. All future purchases receive the tier discount.

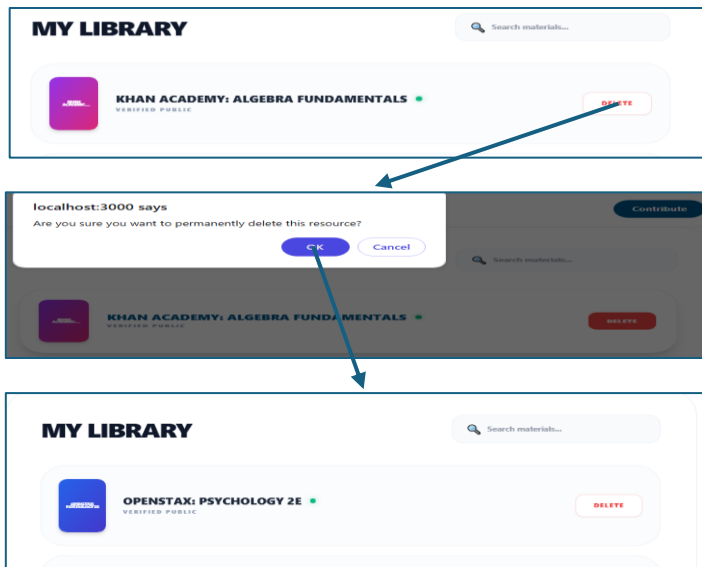

D. Deleting Records (DELETE)

Example 1: Delete an Uploaded Resource

Uploaders can delete their own resources:

Procedure:

1. Go to Dashboard > My Uploads.
2. Locate the resource you want to delete.
3. Click the "Delete" button.
4. Confirm the deletion in the confirmation dialog.

Example 2: Delete a Notification

Users can delete individual notifications:

Procedure:

1. Open the notifications panel.
2. Click the delete icon on a notification.

Expected Output:

The notification record is deleted from the database and removed from the user's notification list.

IX. SEARCHING AND FILTERING RECORDS

A. Searching Resources

The system provides a dynamic search feature on the Home page:

1. Type a keyword in the search bar at the top of the Home page.
2. Results filter in real-time as you type.
3. Matching resources are displayed based on title keyword match.

B. Filtering by Department

Users can narrow the catalog by academic department:

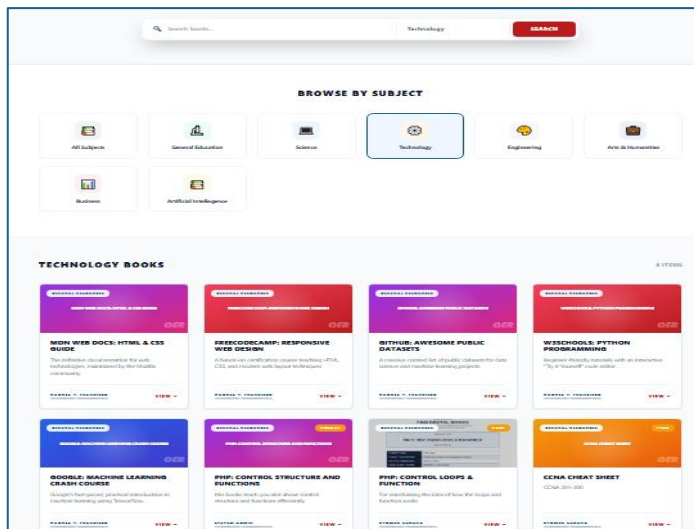

1. Locate the department/subject dropdown above the catalog.
2. Select a department from the dropdown list.

3. The catalog updates to show only resources from the selected department.
4. Select "All Departments" to reset the filter.

C. Sorting Information

The catalog automatically sorts resources:

- New Arrivals section: sorted by creation date (newest first)
- Full catalog: sorted by creation date (descending) by default

X. REPORT GENERATION

The Necry OER Portal includes a Print Report feature for users to generate and print a summary of their account information.

Viewing and Printing Reports

Follow these steps to view and print reports:

1. Go to Dashboard > Profile tab.
2. Scroll down to the "Print Report" section.
3. Click the "Print Report" button.
4. A print dialog opens with a formatted report containing your profile summary, account statistics, and recent activity.
5. Select your printer or choose "Save as PDF" to export digitally.

6. Click "Print" to generate the output.

Report Contents

The generated report includes:

- User profile information (name, email, role)
- Account statistics (total purchases, total uploads, earnings)
- Recent transaction history
- Current subscription tier and benefits
- System-generated date and timestamp

XI. ERROR HANDLING AND TROUBLESHOOTING

The following table documents common system errors and their solutions:

Issue	Possible Cause	Solution
Unable to Login	Incorrect email or password	Use "Forgot Password" to reset. Check email for typos. Ensure email is verified.
"Email Not Verified" Error	Account not yet verified via OTP	Check your email for the verification code. Click "Resend Code" if needed.
Account Locked	Multiple failed login attempts	Wait 15 minutes for the IP lock to expire, then try again with correct credentials.
Cannot Upload File	File too large or wrong format	Ensure file is PDF format and under 100MB. Check your internet connection.
Resource Not Visible	Resource pending admin approval	Wait for an administrator to review and approve your upload. Check notifications.
Payment Failed	Insufficient balance or network error	Check your payment method and try again. Ensure stable internet connection.
Page Not Loading	Network or server issue	Check your internet connection. Verify the server is running. Try refreshing the page.

OTP Not Received	Email delivery delay or wrong email	Wait 1-2 minutes. Check Spam/Junk folder. Click "Resend Code" for a new OTP.
Database Connection Error	Database service not running	Contact the system administrator to start the database service.
Forbidden (403) Access	Insufficient user role permissions	Ensure you are logged in with the correct account role for the feature you are trying to access.
Cannot Open Resource	Resource not purchased	Purchase the resource first. If you are the uploader, ensure you are logged in with the correct account.

XII. FREQUENTLY ASKED QUESTIONS (FAQ)

1. How do I reset my password?

Click the "Forgot Password?" link on the Login page. Enter your registered email address. A 6-digit OTP code will be sent to your email. Enter the code, then set a new password. You can then log in with your new password.

2. How do I edit my profile information?

Go to Dashboard > Profile tab. Your account information (name, email, role) is displayed. You can upload a profile picture by clicking on the profile image area. For changes to core account details, contact the system administrator.

3. How do I purchase a resource?

Browse the catalog and click on a resource you want to purchase. On the Resource Detail page, review the price and any applicable discounts. Click the "Purchase" button, select your payment method (Card, GCash, or Maya), and confirm payment. The resource will be added to your library immediately.

4. How do I withdraw my earnings as an uploader?

First, ensure you have set up at least one payout account (Dashboard > Earnings > Manage Payout Accounts) and set your 6-digit payout PIN. Then, go to the Earnings tab, enter the withdrawal amount, select a payout account, and click "Withdraw". Enter your PIN to confirm. The request will be processed by an administrator.

5. How long does it take for my uploaded resource to be approved?

Resource approval depends on administrator availability. Typically, resources are reviewed within 24-48 hours. You will receive an in-app notification and email once your resource has been approved or rejected. You can check the status in Dashboard > My Uploads.

6. What is the difference between Pro and Pro+ subscription?

Pro subscription gives you a 10% discount on all resource purchases. Pro+ subscription gives you a 25% discount. The discount is automatically applied at checkout. Note that subscription discounts are not stackable with promo discounts — the system applies whichever gives you the better price.

7. Can I access my purchased resources offline?

The Necry OER Portal is a web-based application designed for online access. Resources are streamed securely within your browser and require an active internet connection. For offline access, consider downloading materials if permitted by the uploader.

XIII. SYSTEM MAINTENANCE AND BACKUP

A. Database Backup Procedures

Regular database backups are essential for data safety. To back up the MariaDB database:

1. Open a terminal or command prompt.
2. Run the mysqldump command:

```
mysqldump -u asscat_user -p asscat_db >  
backup_asccat_YYYYMMDD.sql
```

3. Enter the database password when prompted.
4. The SQL file is now saved as a complete database backup.
5. Store the backup file in a secure location (external drive, cloud storage).

B. Database Restoration Procedures

To restore the database from a backup:

1. Create a new database if needed:

```
CREATE DATABASE asscat_db CHARACTER SET utf8mb4;
```

2. Import the backup file:

```
mysql -u asscat_user -p asscat_db <  
backup_asscat_YYYYMMDD.sql
```

3. Enter the database password when prompted.
4. Verify the restoration by checking table counts and data.

C. User Account Maintenance

Administrators can perform the following user account maintenance tasks:

- View all registered users and their account status
- Verify or reject student verification documents
- Suspend or restore user accounts
- Reset user passwords when necessary
- Review and process withdrawal requests

D. System Updates

To update the system to a newer version:

1. Back up the current database and project files.
2. Replace the `asscat-api` and `asscat-client` files with the updated versions.
3. Run `composer install` in `asscat-api` for any new PHP dependencies.
4. Run `npm install` in `asscat-client` for any new frontend dependencies.
5. Check the changelog for any database migration scripts that need to be run.
6. Test all major features after the update.

XIV. APPENDICES

Appendix A: Sample User Accounts

The following are sample accounts for testing and demonstration purposes:

Role	Email	Password
Administrator	admin@asscat.edu.ph	admin123
Uploader	uploader@asscat.edu.ph	uploader123
Student	student@asscat.edu.ph	student123

Appendix D: Additional Screenshots

The first screenshot shows a 'FORGOT PASSWORD' screen. At the top is a yellow key icon. Below it, the text 'FORGOT PASSWORD' is displayed in bold, followed by 'ENTER YOUR REGISTERED EMAIL' in a smaller font. A label 'EMAIL ADDRESS' is positioned above a text input field containing 'morenojundave@gmail.com'. Below the input field is a large blue button labeled 'SEND RESET CODE'. At the bottom, there is a link 'BACK TO SIGN IN' in red text.

An arrow points from the 'SEND RESET CODE' button to the second screenshot, which shows an 'ENTER CODE' screen. At the top is a small icon of a smartphone displaying a code. Below it, the text 'ENTER CODE' is displayed in bold, followed by 'CHECK YOUR INBOX' in a smaller font. A green message box states 'PASSWORD RESET CODE SENT TO YOUR EMAIL.'. Below this is a label 'Code sent to' above a text input field containing 'morenojundave@gmail.com'. A label '6-DIGIT CODE' is positioned above a 6-digit code input field showing '0 0 0 0 0 0'. Below the code input field is a label 'NEW PASSWORD' above a text input field with the placeholder 'Min. 6 characters' and an eye icon. Below the password input field is a large blue button labeled 'RESET PASSWORD'. At the bottom, there is a link 'BACK TO SIGN IN' in red text.

Appendix E: Forms Used by the System

The system uses the following forms for data input:

- Registration Form – Name, Email, Password, Role, Education Level, Proof Document
- Login Form – Email, Password
- Forgot Password Form – Email, OTP Code, New Password
- Upload Resource Form – Title, Author, ISBN, Edition, Publisher, Page Count, Language, Description, File, Cover Image, Department, Course, Section, Price, Material Type, Preview Percentage
- Payout Account Form – Account Type, Account Number, Account Name, Card Details (for Bank)
- Withdrawal Form – Amount, Payout Account, PIN
